

## Orsted - Offshore Wind Farm Competition

We are excited to provide you with the information regarding our Offshore Wind Farm competition from industry partner Orsted. Below are the three areas you need to consider and cover:

1. **We would like to know where you have built your wind turbine, and why you have chosen that area** (Please view the 'How to build an offshore wind farm document' for further information')
2. Did you know that Orsted is the world's most sustainable company? Please answer the below questions:
  - **What does sustainable mean?**
  - **If you were creating a company, what would you do to make it sustainable?**
3. **We want to see pictures of wind turbines.** You can draw a beautiful picture, use empty toilet rolls to build a turbine, or try something completely different! Get creative and put your STEM skills to the test.

There will be a prize in September for the best picture sent back to our Business Engagement Lead, Jennifer Vincent at [j.vincent@enlutc.co.uk](mailto:j.vincent@enlutc.co.uk), along with the questions provided above.

Keep an eye out for upcoming STEM challenges and competitions for the whole family to get involved in!
